

## **Is Your Network Healthy?**

Savvy Solutions has prepared this simple questionnaire to help you assess your computers and address some simple problems that could save thousands of dollars. Benjamin Franklin stated, "An ounce of prevention is worth a pound of cure".

How much productivity would you lose if your computers or your data were not available for an hour, 1 day, 3 days?

1. Are daily backups performed?
2. Have my backups been tested-are they really backing up what I need?
3. What will happen to my backups in case of fire or flood?
4. Do I have proper security on my network?
5. Do the users on my network have proper security assigned to them?
6. Are my mission critical computers receiving proper maintenance?
7. Could I benefit from a wireless network?
8. Are my computers running slow?
9. Could employees be more productive on their computer?
10. Can I reduce my annual IT costs?
